

Supply Chain Management GUIDED TRAINING

Undergraduate Training Program

Introduction

King Faisal Specialist Hospital and Research Centre (KFSH&RC) offers a diverse array of training programs to support the development of healthcare professionals. The Undergraduate Training Programs include Internship Training Programs, Practicum Training Programs, Transition to Practice Programs and Summer Training Programs, providing comprehensive clinical experience to undergraduate students.

Overview of Internship Training Programs

The Internship Training Program is a form of experiential learning that integrates knowledge learned in the classroom with practical application and skills development in a professional setting. Also, designed for non-medical interns, who enrolled in academic institutions. The aim of these programs is to provide interns with fundamental and essential practical skills.

Internship Program:

Supply Chain Management Guided Training

Program Overview:

The Supply Chain Management Internship Program at the King Faisal Specialist Hospital & Research Centre provides undergraduate students with a unique opportunity to gain hands-on experience and apply their classroom learning to real-world situations. The program covers the entire supply chain management process, from planning and purchasing supplies to their delivery and distribution. Interns will learn about various aspects of supply chain management at KFSH&RC, including planning, purchasing/contracts, receiving, warehousing, logistics and distribution. By working in an entry-level capacity and spending time with supervisors and managers, interns will gain practical knowledge of supply chain management concepts and theories. This program is an excellent opportunity for students to contribute to KFSH&RC's continued success in providing the best healthcare services in the region.

Program Objectives:

By the end of the training, participants will:

- Test their interests and skills in a Supply Chain Management career
- Develop practical skills and techniques in the application of theory to practical work situations
- Adjust from college to full-time employment
- Develop attitudes beneficial to effective interpersonal relationships
- Prepare for full-time employment in their area of specialization upon graduation
- Acquire good work habits
- Enhance employment opportunities through the development of employment records and references
