

Cytology Specimen Processing GUIDED TRAINING

Professional Growth and Learning

Introduction

Professional and Development Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to enhance the skills and knowledge of healthcare professionals and other related disciplines. These programs aim to ensure that staff remain up-to-date with the latest medical practices, technologies, and research advancements. Through a variety of workshops, training sessions, and certifications, KFSH&RC fosters continuous learning and professional growth, ultimately improving patient care and hospital services.

Overview of On-The-Job Training (OJT) Programs

On-The-Job Training Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to provide employees with hands-on experience in their specific fields while they work. These programs aim to enhance practical skills and ensure that staff are fully equipped to handle their responsibilities effectively. By integrating training directly into the workplace, KFSH&RC ensures that employees can apply what they learn immediately, leading to improved performance and a more efficient work environment.

Apprenticeship Training Programs (ATP)

The Structured Apprenticeship Training Program (ATP) at King Faisal Specialist Hospital and Research Centre (KFSH&RC) is a premier on-the-job training initiative. This program is meticulously designed to enhance the knowledge and skills required in specialized areas, ensuring participants become highly qualified professionals. KFSH&RC's ATP program is delivered by expert preceptors who use state-of-the-art equipment and technology to provide an engaging and comprehensive learning experience. The program duration ranges from one week to six months, offering a structured training plan that encompasses all the essential competencies needed for success in your field.

ATP Program:

Cytology Specimen Processing Guided Training

Program Overview:

The Cytology Specimen Processing apprenticeship program is a comprehensive training program designed to equip aspiring healthcare professionals with the necessary knowledge and skills to train participants to effectively process cytological specimens using standard methods and technologies. By the end of the training, trainees will be able to perform specimen preparation, prepare cytological cell blocks, operate Thinprep machines, and identify factors of cross-contamination. The program duration is one month, providing a comprehensive learning experience for participants.

Cytology Specimen Processing GUIDED TRAINING

Program Objectives:

By the end of the training, participants will:

- Perform preparation of all cytological specimens.
- Prepare cytological cell block with gel technique based on diagnostic findings.
- Demonstrate how to operate Thinprep 2000 and Thinprep 5000 machines within one week
- Identify factors of cross contamination in cytology processing.

Acceptance Criteria:

Minimum one-year experience.

- Diploma in Medical Laboratory Sciences
- Bachelor degree in Medical Laboratory Sciences
- Medical Laboratory Technician/ Technologist Classification from the Saudi Commission for Health Specialties

Duration:

- One month.

Benefits:

- Medical coverage as per hospital policy.
- Certificate of completion.

Fees:

- 2,000 SAR per month (excluding 15% VAT).
