

Radiation Therapy GUIDED TRAINING

Undergraduate Training Program

Introduction

King Faisal Specialist Hospital and Research Centre (KFSH&RC) offers a diverse array of training programs to support the development of healthcare professionals. The Undergraduate Training Programs include Internship Training Programs, Practicum Training Programs, Transition to Practice Programs and Summer Training Programs, providing comprehensive clinical experience to undergraduate students.

Overview of Internship Training Programs

The Internship Training Program is a form of experiential learning that integrates knowledge learned in the classroom with practical application and skills development in a professional setting. Also, designed for non-medical interns, who enrolled in academic institutions. The aim of these programs is to provide interns with fundamental and essential practical skills.

Internship Program:

Radiation Therapy Guided Training

Program Overview:

The Radiation Therapy Department at King Faisal Hospital is dedicated to offering a comprehensive one-year internship program designed to equip aspiring radiation therapists with the skills and knowledge necessary for excellence in the field. Interns will immerse themselves in all key aspects of radiation therapy throughout this year-long program, including patient assessment, simulation, and the precise delivery of radiation treatments for both pediatric and adult patients.

This internship provides an in-depth, hands-on learning experience in a highly specialized healthcare environment, ensuring that interns develop a strong foundation in both the technical and compassionate aspects of patient care. The program is aligned with national and international standards, making sure that each participant is thoroughly prepared to meet the challenges and responsibilities of a professional radiation therapist.

Our commitment is to mentor and guide our interns as they transition from academic study to clinical practice, helping them to build confidence, competence, and a deep understanding of the vital role they will play in the healthcare team. By the end of the program, interns will have gained invaluable experience and insight, positioning them to effectively contribute to the advancement of radiation therapy and the well-being of their patients.

Program Objectives:

By the end of the training, participants will:

- Apply all radiation therapy knowledge and skills including patient assessment, simulation, and precise radiation delivery.
- Apply theoretical knowledge independently in real-world clinical settings.
- Demonstrate empathy and effective communication in patient interactions.

Radiation Therapy GUIDED TRAINING

- Demonstrate confidence and competence in a multidisciplinary healthcare team, with an emphasis on leadership, teamwork, and problem-solving.
- Apply their training which meets national and international guidelines, for further certification and professional excellence.
- Apply acquired critical thinking and adaptability to navigate the evolving field of radiation therapy.
