

## **Ambulance Services EMT Basic GUIDED TRAINING**

### **Professional Growth and Learning**

#### **Introduction**

Professional and Development Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to enhance the skills and knowledge of healthcare professionals and other related disciplines. These programs aim to ensure that staff remain up-to-date with the latest medical practices, technologies, and research advancements. Through a variety of workshops, training sessions, and certifications, KFSH&RC fosters continuous learning and professional growth, ultimately improving patient care and hospital services.

---

#### **Overview of On-The-Job Training (OJT) Programs**

On-The-Job Training Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to provide employees with hands-on experience in their specific fields while they work. These programs aim to enhance practical skills and ensure that staff are fully equipped to handle their responsibilities effectively. By integrating training directly into the workplace, KFSH&RC ensures that employees can apply what they learn immediately, leading to improved performance and a more efficient work environment.

---

#### **Apprenticeship Training Programs (ATP)**

The Structured Apprenticeship Training Program (ATP) at King Faisal Specialist Hospital and Research Centre (KFSH&RC) is a premier on-the-job training initiative. This program is meticulously designed to enhance the knowledge and skills required in specialized areas, ensuring participants become highly qualified professionals. KFSH&RC's ATP program is delivered by expert preceptors who use state-of-the-art equipment and technology to provide an engaging and comprehensive learning experience. The program duration ranges from one week to six months, offering a structured training plan that encompasses all the essential competencies needed for success in your field.

#### **ATP Program:**

##### **Ambulance Services EMT Basic Guided Training**

#### **Program Overview:**

The Emergency Medical Technician - Basic program is designed to equip trainees with the essential skills and knowledge required to provide standard basic life support in emergency medical situations. This comprehensive training program aims to prepare individuals to handle critical situations and deliver appropriate care to patients in need. Trainees will be trained to accurately measure and interpret vital signs according to ambulance services protocols. This includes learning the appropriate techniques for measuring and documenting vital signs, such as blood pressure, heart rate, respiratory rate, and temperature.

## Ambulance Services EMT Basic GUIDED TRAINING

Understanding and implementing basic treatment plans based on ambulance services protocols will be a key focus. Trainees will learn to assess and prioritize patient needs, administer necessary interventions within their scope of practice, and provide appropriate care in emergency situations. Effective communication and handover report skills are vital in healthcare settings. Trainees will learn how to provide concise and accurate handover reports to other healthcare providers, ensuring critical patient information is effectively communicated during care transitions. Upon completion of the program, trainees will possess the necessary skills and competencies to provide basic life support and contribute effectively to emergency medical services. They will be prepared to handle emergency situations with confidence and provide critical care to patients in need.

### Program Objectives:

By the end of the training, participants will:

- Define safe lifting and moving techniques
- Define Vital Signs
- Retain Vital Signs according to Ambulance Services Protocols
- Select basic treatment plan according Ambulance Services Protocols
- Describe Transporting Patients safely to Emergency Department
- Describe Handover Report to other health care providers
