

Specialized Dysphagia GUIDED TRAINING

Professional Growth and Learning

Introduction

Professional and Development Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to enhance the skills and knowledge of healthcare professionals and other related disciplines. These programs aim to ensure that staff remain up-to-date with the latest medical practices, technologies, and research advancements. Through a variety of workshops, training sessions, and certifications, KFSH&RC fosters continuous learning and professional growth, ultimately improving patient care and hospital services.

Overview of On-The-Job Training (OJT) Programs

On-The-Job Training Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to provide employees with hands-on experience in their specific fields while they work. These programs aim to enhance practical skills and ensure that staff are fully equipped to handle their responsibilities effectively. By integrating training directly into the workplace, KFSH&RC ensures that employees can apply what they learn immediately, leading to improved performance and a more efficient work environment.

Apprenticeship Training Programs (ATP)

The Structured Apprenticeship Training Program (ATP) at King Faisal Specialist Hospital and Research Centre (KFSH&RC) is a premier on-the-job training initiative. This program is meticulously designed to enhance the knowledge and skills required in specialized areas, ensuring participants become highly qualified professionals. KFSH&RC's ATP program is delivered by expert preceptors who use state-of-the-art equipment and technology to provide an engaging and comprehensive learning experience. The program duration ranges from one week to six months, offering a structured training plan that encompasses all the essential competencies needed for success in your field.

ATP Program:

Specialized Dysphagia Guided Training

Program Overview:

The Specialized Dysphagia Training Program is designed to train speech-language pathologists in the comprehensive assessment and management of swallowing and feeding disorders across both adult and pediatric patient populations. This program provides a robust foundation in the theoretical knowledge of dysphagia and feeding disorders. Trainees will learn to effectively communicate assessment findings and treatment outcomes to medical professionals, patients, and families. The curriculum includes interpreting both bedside and instrumental swallow assessments, summarizing findings, and developing individualized treatment programs. Additionally, participants will acquire hands-on skills in executing assessment and treatment procedures for both adult dysphagia and

Specialized Dysphagia GUIDED TRAINING

pediatric feeding and swallowing disorders. it covers strategies for appropriate referral and management, ensuring that speech-language pathologists are well-prepared to address the complex needs of patients with swallowing and feeding disorders.
