

Parenteral Nutrition GUIDED TRAINING

Professional Growth and Learning

Introduction

Professional and Development Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to enhance the skills and knowledge of healthcare professionals and other related disciplines. These programs aim to ensure that staff remain up-to-date with the latest medical practices, technologies, and research advancements. Through a variety of workshops, training sessions, and certifications, KFSH&RC fosters continuous learning and professional growth, ultimately improving patient care and hospital services.

Overview of On-The-Job Training (OJT) Programs

On-The-Job Training Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to provide employees with hands-on experience in their specific fields while they work. These programs aim to enhance practical skills and ensure that staff are fully equipped to handle their responsibilities effectively. By integrating training directly into the workplace, KFSH&RC ensures that employees can apply what they learn immediately, leading to improved performance and a more efficient work environment.

Apprenticeship Training Programs (ATP)

The Structured Apprenticeship Training Program (ATP) at King Faisal Specialist Hospital and Research Centre (KFSH&RC) is a premier on-the-job training initiative. This program is meticulously designed to enhance the knowledge and skills required in specialized areas, ensuring participants become highly qualified professionals. KFSH&RC's ATP program is delivered by expert preceptors who use state-of-the-art equipment and technology to provide an engaging and comprehensive learning experience. The program duration ranges from one week to six months, offering a structured training plan that encompasses all the essential competencies needed for success in your field.

ATP Program:

Parenteral Nutrition Guided Training

Program Overview:

The Parenteral Nutrition Training Program is designed to equip trainees with essential clinical knowledge and practical skills in nutrition support, parenteral nutrition practice, and compounding. The program covers an overview of parenteral nutrition, managing electrolyte imbalances, and designing tailored nutritional regimens for patients. Trainees will learn to review drug therapy for potential interactions and make appropriate modifications. Additionally, the program emphasizes conducting nutritional assessments for patients with medical problems, ensuring comprehensive patient care in parenteral nutrition.

Parenteral Nutrition GUIDED TRAINING

Program Objectives:

By the end of the training, participants will:

- Describe an overview of parenteral nutrition
- Define the impact of electrolyte imbalances and how to manage them
- Explain maintenance or restoration of optimal nutritional support and designing and modifying management according to patient needs
- Decide an appropriate nutritional regimen for patients based on their unique clinical status and recommend appropriate modifications to an existing regimen
- Review drug therapy prospectively for potential drug-drug, drug-laboratory test, drug-nutrient and drug-disease state interactions and recommend appropriate modifications in drug therapy, when appropriate, to avoid undesirable interactions
- Implement a nutritional assessment on patients with medical problems

Acceptance Criteria:

- Minimum 1 year in clinical practice work experience
- Bachelor degree in Pharmacy or PharmD degree
- Valid Saudi Commission Classification

Duration:

- One month.

Benefits:

- Medical coverage as per hospital policy.
- Certificate of completion.

Fees:

- 2,000 SAR per month (excluding 15% VAT).
