

Basic Electroencephalogram (EEG) GUIDED TRAINING

Professional Growth and Learning

Introduction

Professional and Development Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to enhance the skills and knowledge of healthcare professionals and other related disciplines. These programs aim to ensure that staff remain up-to-date with the latest medical practices, technologies, and research advancements. Through a variety of workshops, training sessions, and certifications, KFSH&RC fosters continuous learning and professional growth, ultimately improving patient care and hospital services.

Overview of On-The-Job Training (OJT) Programs

On-The-Job Training Programs at King Faisal Specialist Hospital & Research Centre (KFSH&RC) are designed to provide employees with hands-on experience in their specific fields while they work. These programs aim to enhance practical skills and ensure that staff are fully equipped to handle their responsibilities effectively. By integrating training directly into the workplace, KFSH&RC ensures that employees can apply what they learn immediately, leading to improved performance and a more efficient work environment.

Apprenticeship Training Programs (ATP)

The Structured Apprenticeship Training Program (ATP) at King Faisal Specialist Hospital and Research Centre (KFSH&RC) is a premier on-the-job training initiative. This program is meticulously designed to enhance the knowledge and skills required in specialized areas, ensuring participants become highly qualified professionals. KFSH&RC's ATP program is delivered by expert preceptors who use state-of-the-art equipment and technology to provide an engaging and comprehensive learning experience. The program duration ranges from one week to six months, offering a structured training plan that encompasses all the essential competencies needed for success in your field.

ATP Program:

Basic Electroencephalogram (EEG) Guided Training

Program Overview:

The Basic Electroencephalogram (EEG) apprenticeship program is a comprehensive training program designed to equip aspiring healthcare professionals with the necessary knowledge and skills to perform EEG procedures. This comprehensive training program is designed to assist hospital epileptologists, neurophysiologists, and neurologists in writing diagnostic reports and enable clinicians to

Basic Electroencephalogram (EEG) GUIDED TRAINING

make informed decisions regarding the future evaluation and treatment of patients. Throughout this program, our aim is to equip you with the foundational understanding and practical abilities required in the field of EEG. You will receive in-depth instruction and hands-on experience to develop expertise in accurate electrode application, performing complete EEG procedures, and identifying basic normal and abnormal waveforms.

Program Objectives:

By the end of the training, participants will:

- Demonstrate accurate electrode application
- Perform a complete EEG procedure
- Identify basic normal / abnormal waveforms
- Communicate with clinicians

Acceptance Criteria:

- Demonstrate accurate electrode application
- Perform a complete EEG procedure
- Identify basic normal / abnormal waveforms
- Communicate with clinicians

Duration:

• Three months.

Benefits:

- Medical coverage as per hospital policy.
- Certificate of completion.

Fees:

2,000 SAR per month (excluding 15% VAT).
